Gallery Exhibition July 14th thru September 2nd

Enjoy the diverse interpretation by 48 encaustic/wax artists on the topic of Global Warming. The theme for this 2nd annual exhibit, helps us to examine how we assimilate and personalize the scientific information coming to light about Global warming. We have collaborated with **ART SMART**, teaching encaustic, with the theme of endangered species in mind. Their artwork will be exhibited.

Join us for a stimulating and entertaining weekend! **DISCOVER THE ART OF WAX**
