COLD WAX WORKSHOP

Cold wax medium is a malleable paste of beeswax, odorless mineral spirits and resin. It mixes with oil paint to create a luscious surface that can be textured, smoothed, layered, incised, and scraped back. We'll use a variety of tools and techniques to experiment with texture and layers with the aim of expanding our understanding this versatile medium.

Description:

Class Level: Beginner & intermediate.

The Cold Wax 2Day Workshop is an alternative to encaustic painting. If you love encaustic, but are afraid of fusing, heat, fumes, etc., this is the workshop for you.

We begin by exploring the cold wax properties, how to use it and what not to do with it. We will discuss what rules to follow and which you can break when combining cold wax with oils, and how to create amazing textures.

You will learn how to reveal layers to create depth in your art, have the freedom to experiment with a new materials and discover a new way to get rich, complex and luminous color in your work.

Finally, we'll discuss the importance of an experimental approach and risk taking during the creative process.
