

CARLA CALETTI (NM)

Essence of Change, wax, paper, paint, 20 x 16 inches

Living near the coast in the San Francisco Bay prior to moving to New Mexico this year, we experienced the destruction of multiple fires, power outages and tremendous flooding. "Essence of Change" speaks to the nature of the inevitable impacts of global warming; waters rising, fires burning, power sources stretched beyond capacity and people, communities and livelihoods devastated and displaced.
